ROADS & TRANSPORTATION: MULTI-YEAR PAVEMENT PLAN (FY 2024-28)**EXECUTIVE SUMMARY**

This report is the update of the Public Works Agency Roads & Transportation (PWA-RT) Multi-Year Pavement Plan (Plan) for the County maintained road system. It replaces the previous version of the Plan approved by the Board of Supervisors on July 20, 2021. Periodic updates to the Plan are an essential component if the Plan is to remain viable. It is intended that the Plan be utilized to design, schedule, and accomplish the pavement resurfacing work for the list of roads identified in the Plan. Roads selected for treatment are grouped in Priority ranking and re-evaluated every year and brought to the Board of Supervisors for approval.

BACKGROUND

The Public Works Agency Roads & Transportation pavement management program is based on information obtained through field evaluations of pavement conditions and utilizing the Metropolitan Transportation Commission pavement management program (PMP) and software called StreetSaver. This program has been used by the PWA-RT for over 30 years and has been the key resource for all previous plans approved by the Board of Supervisors. The program is designed to assist in finding cost-effective strategies for providing, evaluating, and maintaining pavement in serviceable condition. The program consists of two basic components:

1. A comprehensive database, which contains current and historical information for each road segment on pavement condition, pavement structure, and traffic; and
2. A set of software tools that allow evaluation of alternatives, determination of existing and future pavement conditions, prediction of financial needs, and the identification and prioritization of cost-effective pavement renovation projects.

The program provides pavement condition index (PCI) data, which is used to establish a baseline for evaluating the pavement condition of one roadway over another. The condition index values are a function of distress type, distress severity, and distress quantity present in the pavement surface using a random sampling inspection area method. The index values have

ROADS & TRANSPORTATION: MULTI-YEAR PAVEMENT PLAN (FY 2024-28)

been established to range from 0 to 100. Higher index values indicate better pavement conditions. For example, a new pavement with no distress is assigned an index value of 100.

FUNDING

The County does not rely on federal funds, general funds, or property taxes for the maintenance of our roadways. California's Highway User Tax Account (HUTA), and on April 6, 2017 the California State Legislature's passage of SB 1 (Beall) and ACA 5 (Frazier) are the only revenue sources to support this plan. For the County of Ventura, this provides adequate funding to allow the PWATD to continue with an ongoing paving plan and maintaining the County road network PCI in the mid 70's.

The Plan proposed is budgeting \$45 million to resurface approximately 192.16 centerline miles of streets within the unincorporated area of the County.

ORGANIZATION OF THE MULTI-YEAR PAVEMENT PLAN

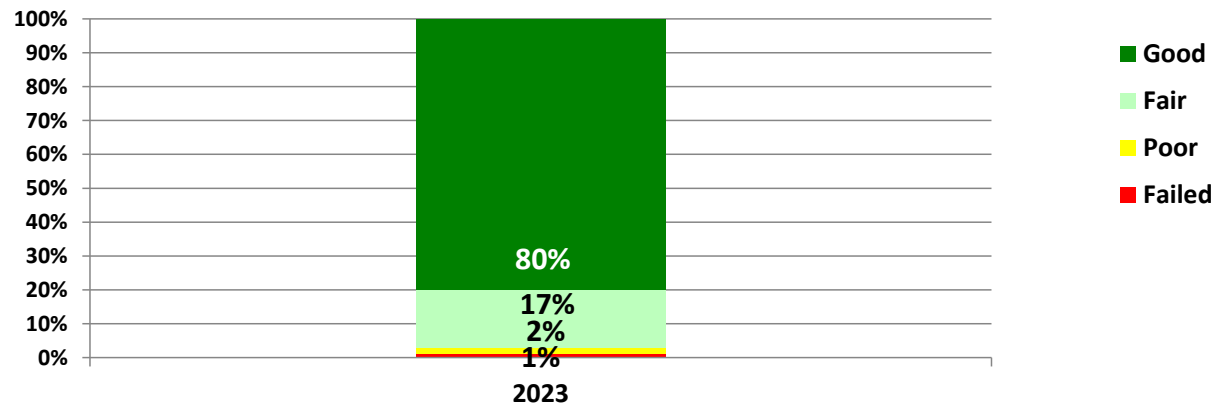

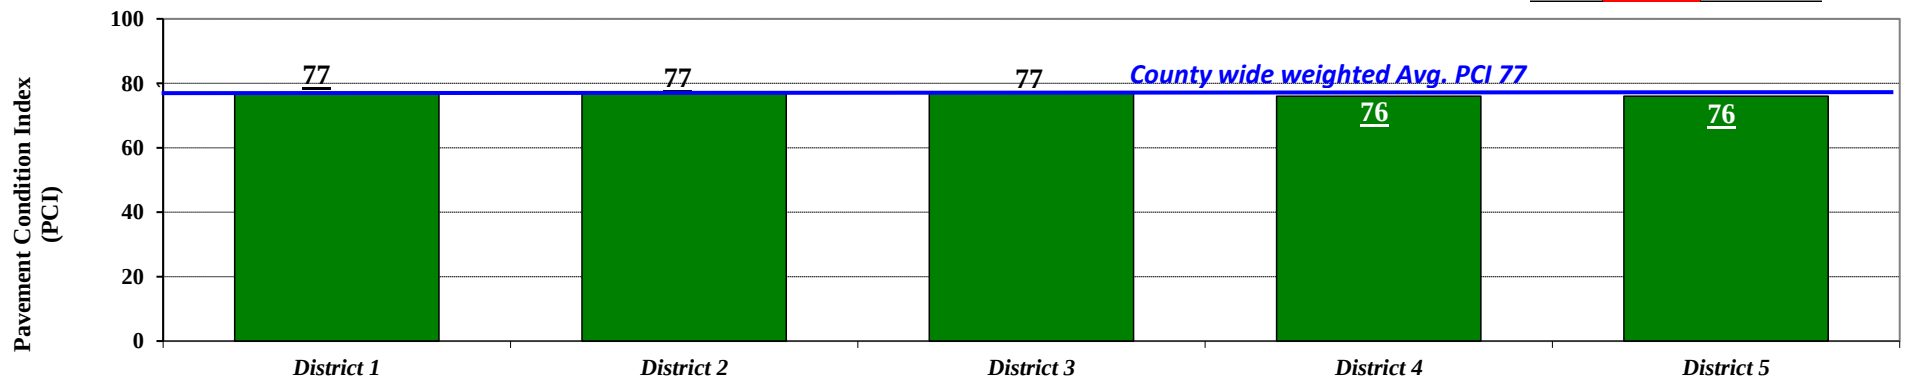

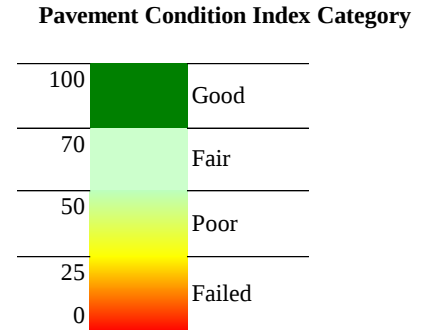

The Multi-Year Pavement Plan for FY 2024-2028 is organized in the following manner:

Table 1. Average Pavement Condition Index (PCI) Summary Report – The County of Ventura has been divided into five Supervisorial Districts. Each of these districts has a certain percentage of County-maintained roads. This summary report shows the average PCI per Supervisorial District compared to Countywide average PCI in graphical and tabulated format.

Table 2. Priority 1-5 Listing of Roads – Identifies roads that have been added into each priority based on the pavement management program.

Table 1 - Pavement Condition Index (PCI) Summary Report

Supervisory District	Average PCI Prior to Redistricting	Centerline Miles per Supervisory District Prior to Redistricting	Average PCI 2023	Centerline Miles per Supervisory District
District 1	76	152	77	154
District 2	77	143	77	152
District 3	77	161	77	146
District 4	77	37	76	35
District 5	77	50	76	56
Countywide Weighted Avg.	76	543	77	543
